

My trip to ECHO

When you take a trip to **ECHO**,

you might travel by foot, or car, or bus.

ECHO is a **museum**.

A museum is a place where people go
to learn and play with friends and family.

In some museums you learn about **art**.
In other museums you learn about
things that **happened long ago**.

When you take a trip to ECHO, you will ask
science questions and...

... learn about the **animals** that live in and around the lake.

If you take a trip to ECHO, you will walk
right in the **door**.

You will be greeted by an ECHO friend
in a **bright blue apron** at the front desk.

There is so much to see and do at **ECHO**.

What do you **see**?

Stand inside a **fog tornado** and feel
the **mist** around you.

Squish and pat down the **sand** to make your own landscape.

Sit in the **pulley chair** and use a **rope** to pull yourself up.

What path will you make for the **balls** to follow?

Visit **Engineer It** and...

solve an **engineering** problem with the ECHO staff.

You can try to balance a **wheel** and
explore the **shipwreck**.

Check out the **animals** like fish, turtles, frogs, and snakes!

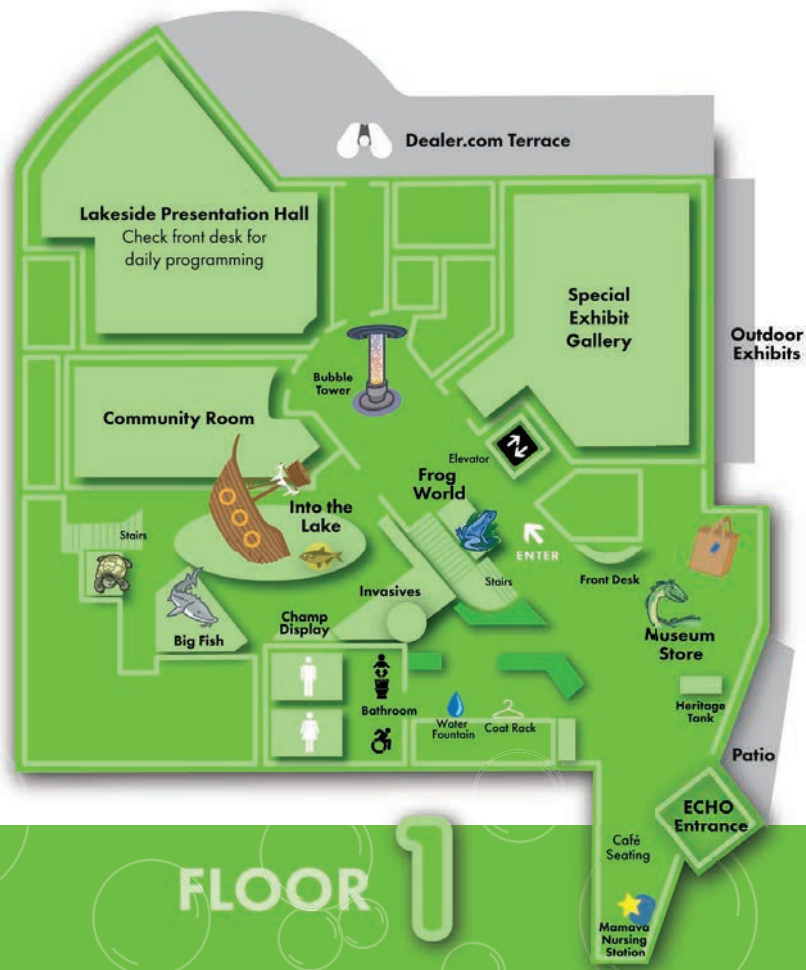

If you take a trip to ECHO, you will want to **come back** again and again!
